DETAILED ACTION

Terminal Disclaimer

The terminal disclaimer filed on 7/28/05 disclaiming the terminal portion of any patent granted on this application, which would extend beyond the expiration date of Application 10/256160 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance: the intervertebral disc having a first baseplate with a central post having a ball at the end with a curvate recess, a second baseplate with a convex structure forming a curvate socket with a protrusion extending into the socket and the ball extending into the socket with the recess accommodating the protrusion. The second baseplate also housing a spring member to accommodate the compressive loads of the vertebrae was found to be novel. The prior art did teach spring members between intervertebral baseplates. The prior art also teaches that ball heads on a post are used between vertebral baseplates. However, the prior art failed to teach a ball with a recess to accommodate a protrusion formed on the convex structure of an opposing baseplate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
